

```
std::integral_constant  
< bool, std::is_base_of  
< Driver< CaptorT >, CaptorT  
>::value >
```

```
flow::is_driver< CaptorT >
```

A blue arrow points from the `flow::is_driver< CaptorT >` expression to the `std::integral_constant` template structure, indicating that the function returns an object of this type.
